TOPIC 1 | PROCESS MODELLING USING BPMN

A hands on training session which will enable you to understand, create and use process models.

Receive comprehensive training on the BPMN 2.0 modelling notation, how to use this to create process models in a specialist tool and deploy it in a real-world situation.

- Interpret process models
- Create process models using a specialist tool
- Consistently apply modelling best practises
- Apply process modelling in a real-world situation

TOPIC 2 | VALUE-DRIVEN PROCESS REPOSITORY DESIGN

Graduate your process capability from simple modelling to full repository management.

Discover how to interconnect your models, target the high impact processes and effectively maintain these, in order to deliver strategy execution at pace with certainty.

- Establish a Process Repository and a strong governance to support this
- Identify usage scenarios for a process repository, and understand the high level approach
- Address critical business challenges using value-driven repository management

TOPIC 3 | RAPID PROCESS IMPROVEMENT

Operationalise your BPM-Discipline to deliver tangible value for your organisation.

Rapid Process Improvement projects generate quick wins and long term benefits. Target high impact processes, collaboratively and critically analyse these, resolve any issues and implement the solutions.

- Use value targeting to align initiatives with business strategy
- Analyse As-Is processes and identify improvement opportunities
- Prepare improvement actions and prepare To-Be processes
- Create work packages and execution plans
