

# SOFTWARE AG / BPM-D® OFFERING

Helping organizations achieve the right performance and digitalization, fast and at low risk. Through rapid process improvement, smart automation and an appropriate process management discipline, we deliver fast results while establishing lasting process capabilities.

The BPM-D approach to Repository Management is used to help ARIS users successfully set-up their repository and create the foundation for enterprise-wide impact of the process repository.

## ■ ARIS Mobilization Workshop

This three day workshop is uniquely placed to give your organisation the initial skills necessary to get going on ARIS using BPMN.

### DAY 1

#### Process Modeling with ARIS

- Value and Positioning of Process Modeling
- Process Modeling Methods (BPMN and others)
- How to use the key elements of BPMN 2.0 on ARIS allowing for modeling experience and familiarity with the tool

### DAY 2

#### Repository Management with ARIS

- Define Repository and Modeling Standards
- Focus on how to use the information which is contained within ARIS in Reports
- Knowledge of how to best structure your repository

### DAY 3

#### Starting your Process Management Journey with ARIS

- Value-driven Business Process Management
- Discussion around pragmatic approaches to the repository management for the business within the ARIS environment.
- Guide participants to model their own processes and offer guidance on the best modeling standards.

**Audience: All levels | Duration: 3 days | Number of Participants: <12**
